

DYNAMIC MOTION

The DYNAMIC C Series represents the new generation of CEHISA machinery which combines innovation, versatility and reliability in a compact size edgebander. This new series incorporates C-Motion Tech. that offers maximum precision and agility when adjusting the working groups.

C-Motion Tech. includes a working software with intuitive interface and motorized adjustment for up to 18 axes to control the edgebander, thus guaranteeing the highest quality finish.

Multi-profile motor driven T&B Trim and Radius Scraper units

## TECHNICAL SPECIFICATIONS

Edging Thickness	mm	0.4 - 3 (5mm Solid)
Panel Thickness	mm	10 - 60
Working Speed	mpm	up to 14 mpm
Motorized axis	-	up to 18
Corner Rounding	-	2 HF Motors
Multi Profile Tool	-	Yes
Centralized Extraction	-	Yes
Remote Connectivity	-	Optional
